

Paper Snowflakes

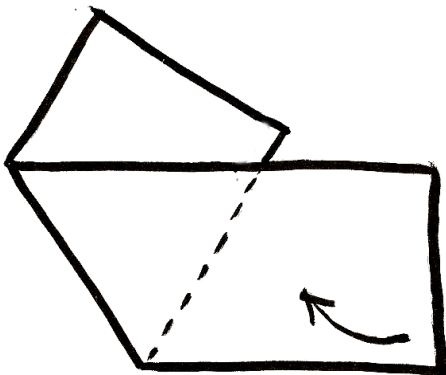

Step One
fold the paper in half

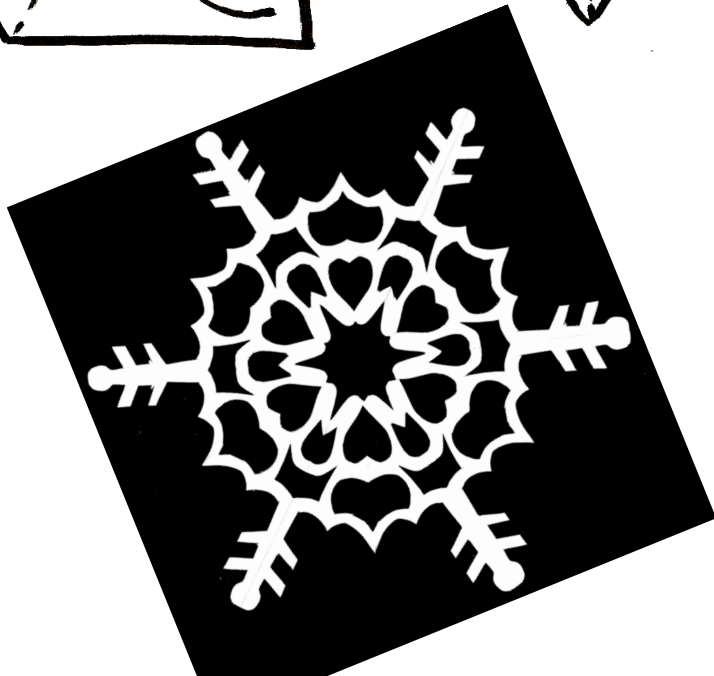

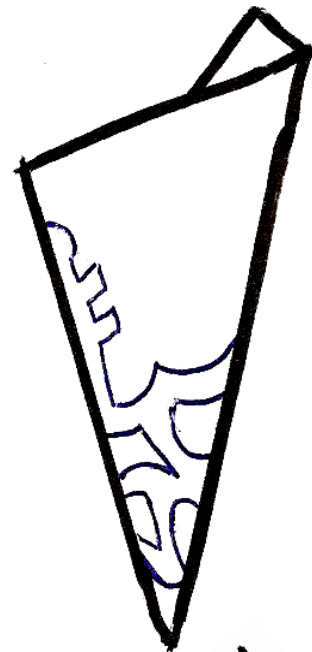

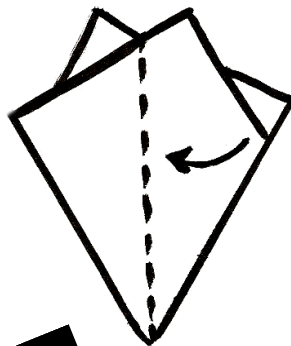

Step Two
creating a tip at the center of the folded

Step Three
flip the paper and
fold the other third

Step Four
fold in half
and cut!

A pattern like this
yields some-
thing like

Here are a few pointers to help you out:

1. At the tip and the top, cut all the way across. Anywhere in the middle, always finish on the same side you start cutting.
2. Find your limits by unfolding it a little. This is to avoid having your snowflake lopped off somewhere.
3. The more paper you remove, the more delicate your snowflake will be.
4. Enjoy! Every snowflake is unique, just like God made each and every one of us unique!
